KIMO

## INSTRUMENTS

## Light transmitter <br> LR 110

## KEY POINTS

- Range from 0 to 10000 lux
- 0-10 V active output, power supply $24 \mathrm{Vac} / \mathrm{Vdc}$ (3-4 wires) or $4-20 \mathrm{~mA}$ output, passive loop, power supply from 16 o 30 Vdc (2 wires)
- ABS V0 IP65 housing, with or without display
- " $1 / 4$ turn" system mounting with wall-mount plate
- Housing with simplified mounting system

## FEATURES OF THE HOUSING

Material : ABS V0 as per UL94
Protection: IP65
Display : LCD 10 digits. Size : $50 \times 17 \mathrm{~mm}$
Height of digits : Values : 10 mm ; Units : 5 mm
Cable gland : For cables $\emptyset 8 \mathrm{~mm}$ maximum
Weight : 140 g
Remote probe : cable of 2 m length in PVC

## TECHNICAL FEATURES

| Measurement units | lux, fc |
| :--- | :--- |
| Measuring range | From 0 to 10000 lux <br> From 0 to 929 fc |
| Accuracy ${ }^{*}$ | $\pm 2 \%$ of reading or $\pm 2$ lux |
| Resolution | 1 lux |
|  | 0.01 fc |
| Type og fluid | Air and neutral gases |
| Conditions of use $\left({ }^{\circ} \mathrm{C} / \% \mathrm{RH} / \mathrm{m}\right)$ | From 0 to $+50^{\circ} \mathrm{C}$. In non-condensing condition. From 0 to 2000 m. |
| Storage temperature | From -10 to $+70^{\circ} \mathrm{C}$ |
| Spectral range (f1) $)^{1}$ | As per standard photopic curve $\mathrm{V}(\lambda) \mathrm{NF} \mathrm{C} \mathrm{42-710} \mathrm{class} \mathrm{C}$ |
| Directional sensitivity (f2) ${ }^{1}$ | $<2 \%$ |
| Linearity (f3) $)^{1}$ | $<2 \%$ |

${ }^{1}$ The f2 and $f 3$ coefficient are defined according to the French NF C 42-710 standard.
*All the accuracies indicated in this technical datasheet were stated in laboratory conditions, and can be guaranteed for measurements carried out in the same conditions, or carried out with calibration compensation.

## PART NUMBER

To order, just add the codes to complete the part number :

[^0]
## Example: LR110-PO

Light transmitter, 4-20 mA passive transmitter with display

## TECHNICAL SPECIFICATIONS

| Output / Power supply | - active $0-10 \mathrm{~V}$ (power supply $24 \mathrm{Vac} / \mathrm{Vdc} \pm 10 \%$ ), $3-4$ wires <br> - passive loop $4-20 \mathrm{~mA}$ (power supply $16 / 30 \mathrm{Vdc}$ ), 2 wires <br> - common mode voltage <30 VAC <br> - maximal load : 500 Ohms ( $4-20 \mathrm{~mA}$ ) / minimum load : 1 K Ohms ( $0-10 \mathrm{~V}$ ) |
| :---: | :---: |
| Consumption | $2 \mathrm{VA}(0-10 \mathrm{~V})$ or $0.6 \mathrm{VA}(4-20 \mathrm{~mA})$ |
| European directives | 2004/108/CE EMC ; 2006/95/CE Low Voltage ; 2011/65/EU RoHS II ; 2012/19/EU WEEE |
| Electrical connection | Screw terminal block for cables from 0.05 to $2.5 \mathrm{~mm}^{2}$ or from 30 to 14 AWG Carried out according to the code of good practice |
| PC communication | USB-mini DIN cable |
| Environment | Air and neutral gases |

## CONNECTIONS

Fixed back housing

## ELECTRICAL CONNECTIONS - as per NFC15-100 standard

This connection must be made by a qualified and trained technician. To make the connection, the transmitter must not be energized.
For LR110-A models with 0-10 V output-active :

To make a 3-wire connection, before powering up the transmitter, please connect the output ground to the input ground. See drawing below.

3 wires

For LR110-P models with 4-20 mA output - passive :

## SETTINGS AND USE OF THE TRANSMITTER

## - Configuration

To configure the transmitter, it must not be energized. Then you can make the required settings thanks to the DIP switches as shown on the drawing below. When the transmitter is configured, you can power it up.

To configure the transmitter, unscrew the 4 screws of the housing then open it. DIP switches allowing the different settings are accessible.

## - Measuring unit setting - Active switch

To set the unit of measurement, put the on-off switches 3 and 4 as shown in the table :

| Configurations | lux |  | fc |  |
| :---: | :---: | :---: | :---: | :---: |
| Combinations | $1 \square \square$ | $1 \square \square$ |  |  |
|  | $2 \square \square$ | $\square$ |  |  |
|  | 3 | $\square$ | $\square$ |  |
|  | 4 | $\square$ | $\square$ |  |

## CONFIGURATION VIA LCC-S SOFTWARE (optional)

An easy and friendly configuration with the software!

- To access to the configuration via software :
- Set the switch as shown beside.
- Connect the cable of the LCC-S to the connection of the transmitter.
- To configure the transmitter, please refer to the LCC-S user manual.

Caution : The configuration of the parameters can be done either by DIP switch, or by software (you cannot combine both solutions).

## FACTOR VALUE ACCORDING TO THE LIGHT SOURCES

The following table indicates the factor value corresponding to different light sources with their examples.
The device is adjusted with an incandescent standard white light source owning its own spectral response. The following lighting sources have a different spectral response. Therefore, the presented coefficients in the following table enable to correct the measurement according to these different sources.
The correction is carried out by multiplying the measured value by the F factor: Corrected value $=\mathrm{Fx}$ measured value.

| Sources | F Factor | Illustration |  |
| :--- | :--- | :--- | :--- |
| Fluorescent tube with three bands | 1.055 | 1.085 |  |
| High pressure mercury lamp | 1.073 | 1.011 |  |
| Sodium vapour lamp | 0.947 |  |  |
| Metal halide lamp with three additives | 0.950 |  |  |
| White led : neutral colour |  |  |  |
| Halogen quartz lamp / tungsten (standard source) |  |  |  |

## ORDER OF MAGNITUDE OF LUX ACCORDING TO APPLICATIONS

Here are a few examples of order of magnitude according to different current situations.

| Environment | Lux | Environment | Lux |
| :--- | :--- | :--- | :--- |
| Outside with open air | 500 to 25000 | Factory : electronic assembling | 1500 to 3000 |
| Outside with direct sunlight | 50000 to 100000 | Hotel reception hall | 200 to 500 |
| Full moon night | 1 | Shop | 750 to 1500 |
| Overnight lit street | 20 to 70 | Hospital operating room | 750 to 1500 |
| Apartment well lit | 200 to $\mathbf{4 0 0}$ | Classroom | 200 to 750 |

## MAINTENANCE

Please avoid any aggressive solvent. Please protect the transmitter and its probes from any cleaning product containing formol, that may be used for cleaning rooms or ducts.

## OPTIONS AND ACCESSORIES

- KIAL-100A : Power supply class 2, 230 Vac input, 24 Vac output
- KIAL-100C : Power supply class 2, 230 Vac input, 24 Vdc output
- LCC-S : configuration software with USB cable
Only the accessories supplied with the device must be used.

## PRECAUTIONS FOR USE

Please always use the device in accordance with its intended use and within parameters described in the technical features in order not to compromise the protection ensured by the device.

Once returned to KIMO, required waste collection will be assured in the respect of the environment in accordance with European guidelines relating to WEEE.
